

Invesco Group

Global

Remuneration Policy

1 January 2024

Approved by

Invesco Compensation Committee

Effective date

01/01/2024

Scope

This policy outlines the remuneration framework applicable to employees of Invesco Ltd. (the “Invesco Group”). In this policy, we may refer to the Invesco Group as the “company,” “Invesco,” “we,” “us,” or “our.” While the general provisions of this policy apply to all employees, some elements of the policy (found in Appendices 2 and 3) are applicable only to “Identified Staff” as defined in Appendix 1. In the event that the policy or elements of the policy apply to Identified Staff, such staff will be informed. Detailed pay-out terms and conditions are included in the incentive plan documents or award agreements and may vary at an individual level.

Information about the Invesco Compensation Committee

The overriding remuneration philosophy of Invesco is set by the Compensation Committee (the “committee”) of the Board of Directors (the “board”) of Invesco. A copy of the committee’s charter is available here: <http://ir.invesco.com/investor-relations/corporate-governance>.

Under its charter, the committee:

- is comprised of at least three members of the board, each of whom is “independent” of Invesco under the rules of the New York Stock Exchange and the Securities and Exchange Commission;
- members are appointed and removed by the board;
- is required to meet at least four times annually; and
- has the authority to retain independent advisors, at Invesco’s expense, whenever it deems appropriate to fulfill its duties, including any compensation consulting firm.

The committee’s responsibilities include, among other items:

- reviewing and making recommendations to the board concerning Invesco’s overall compensation philosophy
- approving Invesco’s compensation-related matters requiring the committee’s approval, including EU remuneration matters
- overseeing Invesco’s equity-based and other incentive compensation programmes
- approving Invesco’s annual compensation pools

On December 7, 2023, the committee adopted this remuneration policy. The committee is responsible for the policy, as well as the remuneration of Identified Staff. The remuneration policy is reviewed annually by the Compliance, Human Resources and Risk Management functions who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of entities within the Invesco Group are also responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the remuneration policy to assess its ongoing compliance with the Invesco Group’s remuneration policies and procedures.

External consultants

Each year the committee engages a third-party compensation consultant to provide an analysis of, and counsel on, Invesco’s executive compensation programme and practices. The nature and scope of the consultant’s assignment is set by the committee. The committee currently engages Johnson Associates, Inc., an independent consulting firm, as its third-party consultant for this review.

In general, the outside consultant,

- assists the committee throughout the year in its analysis and evaluation of Invesco’s overall executive compensation programmes, including compensation paid to its directors and executive officers;
- attends certain meetings of the committee and periodically meets with the committee without members of management present;
- provides the committee with certain market data and analysis that compares executive compensation paid by the company with that paid by other firms in the financial services industry and certain investment management firms which Invesco considers generally comparable to it; and
- provides commentary regarding market conditions, market impressions and compensation trends.

Invesco's compensation philosophy

As an investment management firm, one of our greatest assets is the skill and experience of our employees. It is critical that we are able to attract, retain and motivate talented professionals while aligning their incentives with the interests of our clients and shareholders.

Our compensation programmes are designed and structured to align with our four key strategic objectives set forth below:

- achieve strong investment performance;
- be instrumental in our clients' success;
- harness the power of our global platform; and
- perpetuate a high-performance organisation.

To support our strategic objectives, we have structured our compensation programs at every level to achieve the following objectives:

- align individual awards with client and shareholder success;
- balancing pay-for-performance with economic outcomes;
- reinforce our commercial viability by closely linking rewards to results at every level;
- recognise and retain top talent by ensuring a meaningful mix of cash and deferred compensation in accordance with applicable remuneration regulations; and
- discourage excessive risk-taking that would have a material adverse impact on our clients, shareholders or company.

As employees progress to higher levels in the Invesco Group, their ability to affect our performance generally increases and our need to retain these employees increases correspondingly. The committee believes that as an individual's compensation increases, the percentage of that compensation that is deferred should therefore also increase.

Risk management

The remuneration policy ensures that the remuneration of our employees is consistent with and promotes sound and effective risk management and does not encourage risk-taking that is inconsistent with the risk profiles, rules or instruments of incorporation of each fund they manage, or exceeds Invesco Group's tolerated risk levels. The risk weighted performance assessment criteria may vary at an individual level and may be communicated directly to employees as part of the annual performance management process or the applicable incentive plan document.

The policy focuses on ensuring sound and effective risk management through:

- a structured process for setting goals and communicating these goals to employees;
- including both financial and non-financial goals in performance and results assessments;
- ensuring fixed remuneration forms a significant proportion of total remuneration;
- ensuring that variable remuneration structures do not reward excessive risk taking by aligning these structures with applicable regulatory remuneration requirements.

The remuneration policy is designed to align with the business strategy, objectives, values and interests of the management companies, the managed funds and their investors, and includes measures to avoid conflicts of interest.

Further there is a dedicated Conflict of Interests policy in place covering entities falling under EU regulations.

Link between pay and performance

Management, with the guidance and input from the board, annually reviews our multi-year strategic imperatives in the context of global trends and macro themes that impact the asset management industry, our position within key markets and the financial implication of our decisions. The outcome of the review is the establishment of an annual operating plan, composed, in part, of our business priorities and related projected financial outcomes.

Throughout the year, the board examines with management our progress against our multi-year strategic imperatives and annual operating plan. The committee annually establishes and approves an overall Invesco-wide incentive pool based on pre-cash bonus operating income ("PCBOI"). The committee uses a range of 34%-48% of PCBOI in setting the company-wide incentive pool. The pool includes the cash bonus, deferred and equity pools, as well as the amounts paid under sales commission plans. The range was determined based on historical data and practices of asset management and other similar financial services firms as analyzed by Johnson Associates, Inc. and data obtained from the McLagan and CaseyQuirk Performance Intelligence Study. Linking the aggregate incentive compensation pool to a defined range of our PCBOI ensures that incentive compensation is commercially viable. The allocation of the pool to employees is aligned with the strategy, objective, values and long-term interests of the Invesco Group.

Allocations for each business area may be adjusted by Invesco's CEO based on an assessment of financial and strategic achievements of each business area. Business area cash and equity deferral pool allocations are then awarded to each business area employee by the area's management.

Performance at an individual level is measured through a company-wide, online performance management process that has been developed to:

- promote alignment of individual employee efforts with the mission, principles and goals of our company;
- provide the feedback necessary for employee growth and development; and
- improve our ability to assess and recognise performance.

Invesco's performance management process ensures that all employees have their performance consistently assessed regardless of their location or function and consists of 3 key elements:

- an assessment of individual or team-based objectives which have been agreed between the manager and employee;
- assessment against a single, global set of competencies which are based on Invesco's business principles. The Invesco competency framework builds on these business principles by highlighting key behaviours that contribute to their achievement. In addition, the framework includes leadership competencies to help gauge the performance of our people managers; and
- an employee self-evaluation is completed prior to the manager evaluation of the employee.

Individual performance, as measured through the performance management process, is used to differentially reward high performers in support of our remuneration philosophy.

The company awards variable remuneration to the extent that it is justified based on the employee's performance and conduct. Good performance cannot offset poor conduct or vice versa.

Elements of Invesco remuneration

Remuneration in the context of this policy means:

- Fixed remuneration – including base salary, pension and other corporate benefits; and
- Variable remuneration – performance-based remuneration.

The following table describes each component of our compensation programme for employees as well as its purpose and key measures. Specific requirements apply to employees classified as Identified Staff. See the Identified Staff policy in Appendix 1 and the additional requirements in Appendices 2 and 3.

Component	Purpose	Description
Base salary	Provides fixed pay for the performance of day-to-day job duties Sole source of fixed cash compensation	Based on knowledge, skills, experience and scope of responsibility Generally, remains static unless there is a promotion or adjustment needed due to industry trends
Pensions and other benefits	Assists employees with retirement planning and provides insurance coverage and other corporate benefits	
Annual incentive award Cash bonus and fund deferrals	Current year achievement of goals and objectives Aligns with company, business unit and individual performance Deferral portion aligns employee with client and shareholder interests and encourages retention by vesting over time	Based upon assessment of company performance and individual performance With respect to deferred awards, we grant awards denominated in our product fund offerings Our annual deferral awards vest over four years in equal annual increments of 25% per year
Long-term incentive awards Equity and notional fund awards	Recognizes potential for future contributions to the company's long-term strategic objectives Aligns staff with client and shareholder/investor interests and encourages retention by vesting over time	Based upon assessment of company and individual performance Our long-term awards include equity awards and notional fund awards. The long-term awards are time-based and vest over four years in equal annual increments of 25% per year
Performance shares Equity	Aligns executive with client and shareholder interests Encourages retention by vesting based on time and performance measures	Aligns executive with client and shareholder interests Reflects assessment of company and individual performance Encourages retention by vesting based on time and performance measures
Investment Incentive	Applies to investment teams Provides a competitive annual incentive opportunity Aligns employees with shareholder / investor interests Encourages retention by vesting over time	The incentive pools or individual allocations are typically determined based on multi-year investment performance of the portfolios managed by the investment team and factors linked to the team's financial performance From the incentive pool, individuals are paid based on an assessment of multi-year performance of the funds they individually manage as well as assessment of qualitative criteria for the role in question informed by the annual appraisal process A portion of pay-outs from the plan are subject to being deferred into funds or IVZ stock over a multi-year period

Our annual awards

We use our annual awards, which consist of cash and annual fund deferred awards, to recognize current year performance and closely align employees' interests with those of clients and shareholders, differentially reward high performers and link compensation to financial results. Our annual fund deferral awards vest over four years in 25% increments each year. For employees falling under specific regulatory pay-out requirements additional retention periods apply.

Our equity awards

Our equity awards are comprised of time-based and performance-based awards. The committee believes equity awards should align employee and shareholder interests and, with respect to executive officers of Invesco Ltd., a portion of awards should be paid only upon achievement of targeted financial results. In particular, the committee believes that the design of the long-term equity awards should:

- focus our management on preserving value for our shareholders;
- hold our executives accountable for the sound management of the company; and
- tie a specific portion of our executive officers' compensation to a measure that management can most directly influence that will ultimately lead to shareholder value.

Time-based awards

Time-based equity awards vest ratably in 25% increments each year. With respect to executive officers of Invesco Ltd., 40% of equity awards generally are time-based.

Performance-based awards for executive officers¹

60% of equity awards are performance-based. Vesting is tied to the following two performance measures — adjusted operating margin and relative TSR over a three-year period. The committee believes tying vesting to both adjusted operating margin and relative TSR over a multi-year period aligns with shareholder interests and the following goals with respect to performance-based awards:

Relative TSR

- tracks value created for shareholders as a quantitative measure
- aligns with shareholder interests

Adjusted operating margin (AOM)

- focuses discipline in corporate investments, initiatives and capital allocation
- is consistent with the way the business is managed
- is an important measure of overall strength of an asset manager
- aligns with Invesco's shareholder value framework
- is a primary measure of focus of industry analysts
- is improved through effective management over the long-term
- more effectively avoids conflicts of interest with clients

Performance award vesting matrix

The number of shares that vest will equal the target award amount multiplied by the vesting percentage associated with the Average AOM and Relative TSR ranking on the chart below. Vesting may range from 0% to 150%. We believe that the linked vesting performance thresholds provides significant rigor to our incentive program, as payouts are not a range of outcomes but represent specific performance levels.

Below is a summary of the features of our performance awards:

Performance-based award features

Performance period	Three years
---------------------------	-------------

Performance metrics	Absolute adjusted operating margin and Relative TSR
----------------------------	---

Performance vesting range	0%-150%; ratable straight line interpolation used for actual AOM result
----------------------------------	---

Vesting	3-year cliff
----------------	--------------

¹ Applies to CEO and Senior Managing Directors only. With respect to Senior Managing Directors subject to regulatory remuneration requirements, 50% of equity awards are performance-based.

Dividends	Deferred and paid only to the extent an award vests
Settlement	Shares
Clawback	Subject to clawback policy in the event of fraudulent or willful misconduct

The below vesting matrix is for performance-based equity awards granted in February 2023, in connection with 2022 pay.

Absolute 3-year Average AOM²	Relative TSR				
	Lowest	40% tile	55% tile	75% tile	Highest
> 37%	100%	116%	133%	142%	150%
37%	83%	103%	122%	133%	142%
34%	67%	90%	111%	123%	133%
32%	50%	75%	100%	113%	125%
30%	33%	58%	83%	100%	117%
28%	17%	42%	68%	88%	108%
<28.0%	0%	25%	50%	75%	100%

If Invesco's relative TSR is the lowest percentile and absolute 3-year average adjusted operating margin is less than 28%, then our CEO and each of our other executives will not be entitled to a distribution of any shares or accrued dividends. In addition, if the company's 3-year absolute TSR is negative, vesting will be capped at 100%.

The rigor of the thresholds, as well as the partial vesting of awards for failure to meet the target range and an upside opportunity for performance beyond the target range, align with the company's operating plan and the committee's belief that the company's performance-based awards demonstrate our pay-for-performance philosophy.

Remuneration decision-making rationale

Salary increase decisions take into account market position, performance, and internal equity. Salary increases are targeted where market positioning does not already align with performance.

Bonus decisions support a meritocracy, providing the most significant rewards to the highest contributors. Individual cash bonuses are based on a variety of factors including internal performance comparisons, external market comparisons, and formulaic portions of incentive plans (for specific groups of employees).

As an individual's compensation increases, the proportion of that compensation received in the form of a long-term award should increase in order to further the alignment of that employee's interest with those of Invesco. As a result, employees earning over a threshold level in cash compensation will typically have a portion of their annual incentive award deferred into investment portfolios managed by the firm.

All employees may be considered for long-term awards, however, managers use incentive pools to retain key talent, to reward those who make the strongest contributions in a given year, and who have high potential to impact business results in the future. Long-term awards reward for longer-term performance, and therefore, vest over a multi-year period.

Remuneration in control functions

Reporting lines for control functions are typically separated from the business units that they oversee and have appropriate authority. The amount of any incentives available for distribution to employees in control functions is not determined by the performance of the business unit that they oversee. Instead, remuneration for control function employees is linked to the satisfaction of function specific objectives and is adequate to attract qualified and experienced employees. Remuneration for employees in control functions is not approved by any business unit overseen by these functions.

² Points between the stated data points are determined by ratable straight-line interpolation.

Invesco Group pension and other benefits

Invesco Group's pension policy is in line with the business strategy, objectives, values and long-term interests of the Invesco Group, and, where applicable, the relevant management companies and managed funds.

Hedging strategies

Employees are prohibited from using personal hedging strategies or remuneration and liability-related insurance to undermine the risk alignment effects embedded in their remuneration arrangements.

Variable remuneration is not paid through vehicles or methods that facilitate the avoidance of relevant regulatory requirements.

Recoupment Policy

The company adopted the Invesco Ltd. Policy for Recoupment of Incentive Compensation ("Recoupment Policy") effective December 1, 2023. Persons who are current or former officers of Invesco Ltd. subject to Section 16 of the U.S. Securities Exchange Act of 1934 ("Section 16 Officers") are subject to the Recoupment Policy. Section 16 Officers include our CEO and Senior Managing Directors. The Recoupment Policy provides for the recoupment of certain incentive-based compensation paid to the Section 16 Officers in the event the Company (i) is required to issue a restatement of financial results to correct a material error; or (ii) experiences a little "r" restatement where an error occurs that is immaterial to the prior period financial statements; however, correcting the error, or the lack of correcting the error, in the current period would materially misstate the current period financial statements.

Termination payments

Payments related to the early termination of a contract reflect performance achieved over time and are designed in a way that does not reward failure.

Appendix 1: Identified Staff Policy

This Identified Staff Policy was last reviewed on 28th January 2022, and is subject to change from time to time to ensure compliance with regulatory requirements.

For the purpose of this appendix, the following table outlines which Directives/ Remunerations Codes apply to which Invesco entities.

Alternative Investment Fund Managers Directive (AIFMD) Undertakings for the Collective Investment in Transferable Securities Directive V (UCITS V)	Directive (EU) 2019/2034 of on the prudential supervision of investment firms (IFD) Wertpapierinstitutsgesetz (WpIG) / Wertpapierinstituts-Vergütungsverordnung (WpIVergV)	MIFIDPRU Remuneration Code, SYSC 19G (IFPR)
Invesco Fund Managers Limited (IFML)	Invesco Asset Management Deutschland GmbH (IAMD)	Invesco Asset Management Limited (IAML)
Invesco Real Estate Management S.a.r.l. (IREM)		
Invesco Management SA (IMSA)		
Invesco Investment Management Limited (IIML)		

The above listed Directives/ Remunerations Codes specify certain requirements applicable to employees (including delegates) whose professional activities have a material impact on the risk profile of the respective Invesco entities. Such employees are referred to as 'Identified Staff'. Subject to the specific criteria within the different Directives / Remuneration Codes, Identified Staff generally include the following categories of staff:

1. Senior management / Members of the Management body;
2. Risk takers / Staff with managerial responsibility for regulated activities;
3. Control functions
4. Staff who fall into the same remuneration bracket as those listed above and whose professional activities have a material impact on the risk profile of the AIFM or UCITS management company or their managed funds;
5. Categories of staff of firms to which investment management activities have been delegated by an AIFM or UCITS management company, whose professional activities have a material impact on the risk profiles of the AIFs or UCITS that such management company manages;
6. Certified Staff (as defined under the Senior Managers and Certification Regime).

Senior management / Members of the Management body

Senior management includes the board of directors of the AIFM or UCITS management company, and staff with managerial or supervisory responsibility who report to a member of the board of directors of such management company. In addition, staff responsible for heading the portfolio management, administration, sales, and HR functions for such management companies are included.

For IPL, IAML and IFML, senior management typically encompasses staff who are Senior Managers or Certified staff, or who have a management or supervisory responsibility for IAML and report to a member of the board of directors of IAML.

Risk takers / Staff with managerial responsibility for regulated activities

In relation to the AIFM or UCITS management company and its delegates, risk takers include the following:

- Fund managers;
- Heads of Sales;
- Heads of Distribution for the management company's funds;
- Individuals who are capable of entering into contracts/ positions and taking decisions that materially affect the risk positions of such management company or its managed funds; and
- Staff whose activities could potentially have a significant impact on such management company's results, balance sheet or the performance of its managed funds.

For IAML, risk takers include staff members with managerial responsibility for or authority to:

- Investment management, investment advice and trading;
- Prevention of money laundering and terrorist financing;
- Material risks within the firm
- Technology, Information Security and outsourcing arrangement; and
- Approving the introduction of new products.

For IPL, risk takers include Senior Managers and Certified Staff.

For IIML, risk takers includes Pre-Approval Controlled Functions (PCFs).

Control functions

Control functions include:

- Staff responsible for risk, compliance and internal audit for the AIFM or UCITS management companies; and
- Heads of support, risk, internal audit, and compliance for IAML and other individuals within the control of such persons who have a material impact on IAML's risk profile.
- Key function holders, and individuals with significant levels of responsibility, for risk management, compliance, actuarial and internal audit at IPL.

Appendix 2 – Remuneration Requirements

Remuneration paid to Identified Staff of the AIFM and UCITS management companies (and their delegates); IAML, the IUK Consolidation Group and IPL is subject to the additional requirements set out below.

Balance between fixed and variable remuneration

Base salaries and total remuneration packages are regularly benchmarked to market ranges to ensure they are sufficiently competitive and appropriately balanced. The fixed component of total remuneration packages represents a sufficiently high proportion to allow the operation of a fully flexible policy on variable remuneration, including the possibility of paying none. Risk management and compliance staff of IAML receive a higher proportion of fixed remuneration than employees in other business areas.

For IAML and IAMD internal ratios were set according to regulatory requirements.

Performance assessment

Performance related remuneration is based on a combination of the assessment of the performance of the individual, their business segment or managed funds (including its risks), and the overall results of the company that the individual works for. Financial and non-financial criteria are taken into account when assessing individual performance.

The assessment of performance is discretionary and set in a multi-year framework to ensure that the assessment process is based on the longer-term performance of the funds; IAML and IPL (as applicable) and its investment or business risks (as applicable).

For IPL, IAML and IFML, performance related remuneration is also reviewed against the Individual and Senior Manager Conduct rules.

Guaranteed variable remuneration

Guaranteed variable remuneration is granted only in exceptional cases to attract highly specialised individuals. In accordance with regulatory requirements, such pay will be granted only in the case of hiring new staff and for a maximum term of one year only. For Identified Staff of IAML, guarantees are no more generous in amounts or terms to the variable remuneration awarded or offered by the employee's previous employer and are subject to equivalent deferral criteria and appropriate performance adjustment requirements.

Severance Pay

Severance payments to Identified Staff relating to the early termination of an employment contract reflect the individual's performance over time and do not reward failure or misconduct. The determination of severance payment is subject to the case specific circumstances and applicable statutory requirements.

Performance adjustment (Malus & Clawback)

Variable remuneration, including the deferred portion, is paid or vests only if it is sustainable according to the financial situation of the management company as a whole, and justified according to the performance of the business unit, the managed funds and the individual concerned.

The total variable remuneration is reviewed against the firm's financial performance and the individual's conduct. Invesco may, in light of fraud, willful misconduct or significant negative financial performance, adjust total variable remuneration, taking into account both current compensation and reductions in pay-outs of amounts previously earned, through malus or clawback arrangements, respectively.

Policy review

The remuneration policy and associated procedures will be reviewed annually by the Boards of the respective regulated entities.

Appendix 3 – Deferral and Instruments

In addition, remuneration paid to Identified Staff of Invesco Fund Managers Limited, Invesco Investment Management Limited, and Invesco Management SA is subject to the requirements set out below. The requirements also are applied to remuneration paid by delegates that are not subject to 'equally-as-effective' remuneration rules.

Deferred awards

Appendix 4 - MaComp

In addition, variable remuneration paid to Identified Staff of Invesco Asset Management Deutschland GmbH and Invesco Management SA is subject to the requirements set out below.

Ratio of Fixed to Variable Remuneration

Base salaries and total remuneration packages are regularly benchmarked to market ranges to ensure they are sufficiently competitive and appropriately balanced. The fixed component of total remuneration packages represents a sufficiently high proportion to allow the operation of a fully flexible policy on variable remuneration, including the possibility of paying none. Average variable remuneration is limited to a maximum of ten times fixed remuneration over a three-year period.

Appendix 5 - EU Benchmarks Regulation

In addition, the EU Benchmarks Regulation ("EU BMR") specifies certain remuneration requirements in relation to employees who are involved in the determination and creation of benchmarks by Invesco Indexing LLC, and whose activities thus have a material impact on the risk profiles of the UCITS management companies or their managed funds, or on IAML and any other investment firms which may use the benchmarks within the context of the EU BMR.

In addition, remuneration paid to persons involved in the determination and/or creation of benchmarks of Invesco Indexing LLC and Invesco Asset Management Limited is subject to the requirements set out below. The requirements are also applied to remuneration paid by delegates that are not subject to 'equally-as-effective' remuneration rules.

Remuneration provisions of the EU Benchmarks Regulation

The compensation and performance evaluation of persons involved in the determination and/or creation of benchmarks shall not be connected with the performance of the benchmarks or the products which are using such benchmarks.

Appendix 6 - EU Sustainable Finance Disclosure Regulation

In addition, under the EU Sustainable Finance Disclosure Regulation ("SFDR") it is required to include information on how remuneration policies (as applicable under UCITS, Solvency II AIFMD and MiFID) are consistent with the integration of sustainability risks.

Integration of sustainability risks

As outlined in this policy, the measurement of performance used to determine incentive pools includes an adjustment mechanism to take into account all relevant types of current and future risks - including sustainability risks integrated within the investment process of Invesco's investment centres subject to SFDR.

Appendix 7 – CSSF Circular 10/437 (“Circular”) Guidelines concerning the remuneration policies in the financial sector

In addition, the Circular 10/437 applies to all Luxembourg entities, legal and natural persons, subject to the CSSF’s prudential supervision, including Invesco Real Estate Management S.a.r.l. (IREM), Invesco Management SA (IMSA) and their respective branches in the EU.

Application of CSSF Circular 10/437

The Invesco Group Global Remuneration Policy complies with the CSSF Circular 10/437 by maintaining a remuneration policy and remuneration processes aligned with the requirements of the Circular. In particular, the policy is consistent with and promotes sound and effective risk management and remuneration structures which do not reward excessive risk-taking.

Further, the requirements of the CSSF Circular 10/437 are equivalent to existing rules under the UCITS V Directive and the AIFMD frameworks which have been implemented for IREM and IMSA.
